DRAINAGE CALCULATIONS

PROJECT OWNER:

Center Point Contractors
10316 East Hwy 72
Bentonville, AR 72712

PROJECT LOCATION:

This project is located 10316 East Hwy 72. See the attached vicinity map for a more detailed location.

PROJECT DESCRIPTION:

The existing site is approximately 5.5 acres and consists of a cleared dirt storage area and grass. The proposed improvements to the site are to add a shop and a class 7 base parking / storage lot. See the site plan for details.

SITE DRAINAGE:

This project is flows into a tributary of Spanker Creek and thence into Spanker Creek and thence into Little Sugar Creek and thence into the Elk River. The soil types for the drainage basin found on the Benton County Arkansas Soil Survey consist of the following: Tonti Gravelly Silt Loam (C), Captina Silt Loam (C).

Group C soils have low infiltration rates when thoroughly wetted and consist chiefly of soils with a layer that impedes downward movement of water and soils with moderately fine to fine texture. These soils have a low rate of water transmission (0.05-0.15 in/hr).

No portion of this property is located in flood zone "A" or is inside the 100-year flood plain as shown by the National Flood Insurance Program's Flood Insurance Rate Map for Benton County, Arkansas (Map No. 05007C0095 K, June 5, 2012).

Currently, the runoff flows from the east to the west and will continue to do so after development.

AREA DRAINAGE PROBLEMS:

We are not aware of any known area drainage problems on or around this property.

DRAINAGE DESIGN:

A runoff curve number for the onsite drainage area was computed for each basin, based on the soil classification, ground cover, and the development in the area. The curve numbers were selected from the City of Bentonville Drainage Manual for pre-development and post-development conditions. See the drainage area map for locations and below for composite curve number calculations.

<u>Pre Developed</u>		<u>Total Acres 5.51</u>
Pasture, grassland good condition	(74)	3.06 ac
Woods in fair condition	(70)	1.18 ac
Dirt	(87)	1.27 ac
Impervious areas	(98)	0.00 ac
Pre developed composite curve number		(76)

Post Developed Total Acres 5.51

Pasture, grassland good condition	(74)	2.80 ac
Woods in fair condition	(70)	1.18 ac
Class 7 Base	(89)	1.28 ac
Impervious areas	(98)	0.25 ac

Post developed composite curve number (77)

The 2-year through 100-year frequency storm events for pre- and post- development peak flows were calculated using the drainage program Hydraflow Hydrographs (SCS Method).

SUMMARY OF RUNOFF:

Basin 1

The post-developed peak runoff will slightly increase due to the addition of the class 7 base storage area and the building. However, detention is proposed to reduce the peak runoff to pre developed conditions.

Design Storm	Basin 1 Pre-Dev.	Basin 1 Post Developed	Difference
2-yr	5.97	5.86	-0.11
10-yr	11.43	10.36	-1.07
25-yr	14.29	12.65	-1.64
50-yr	17.18	14.88	-2.30
100-yr	19.37	17.60	-1.77

EROSION AND SEDIMENT CONTROL:

See SWPPP and Erosion Control Plan for details.

CONCLUSION:

Improvements to the site will consist of the addition of a class 7 base storage area and shop building. The additions will replace some of the green space with impervious area and but will only slightly increase the peak runoff from the basin. However, detention is proposed to reduce the peak runoff to pre developed conditions.

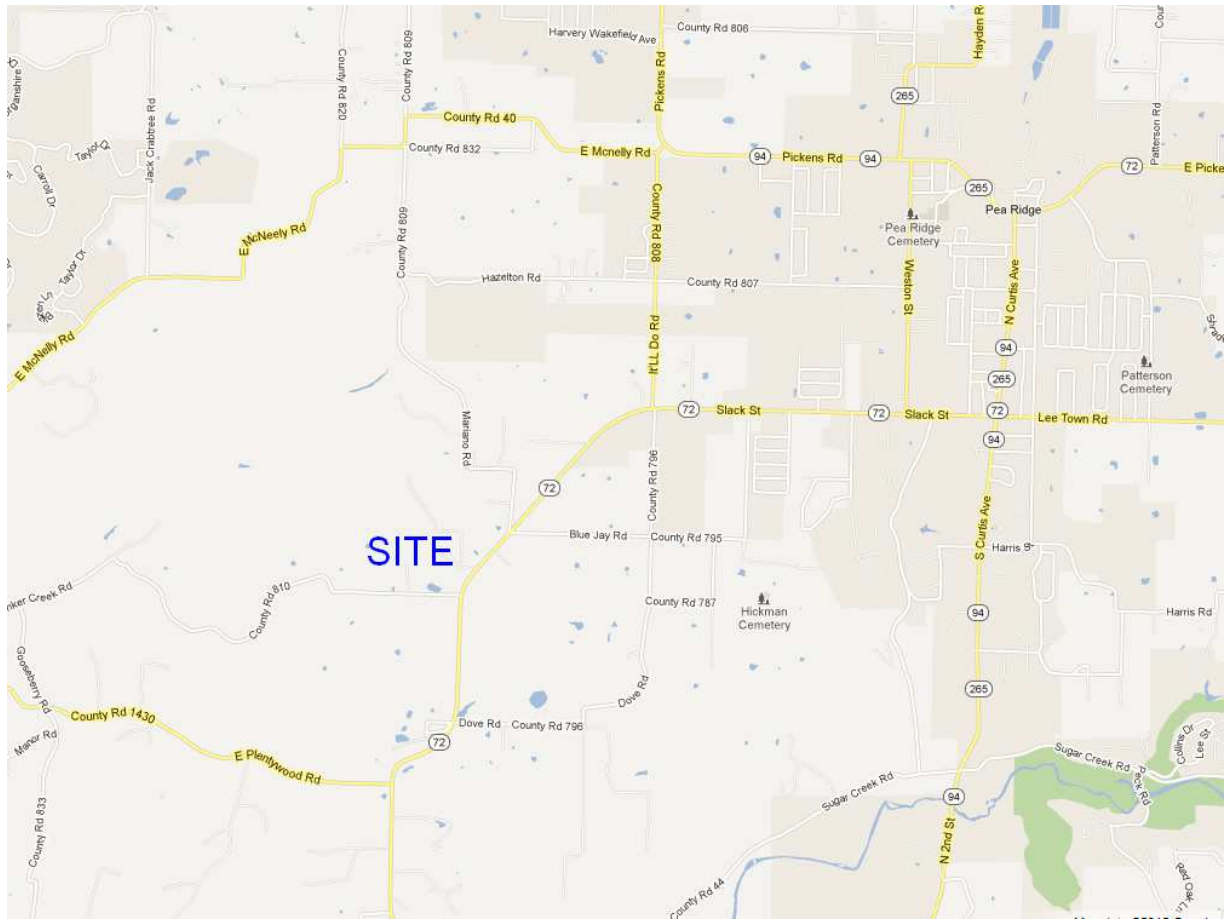

CERTIFICATION:

I, Geoffrey H. Bates, Registered Professional Engineer No. 9810 in the State of Arkansas, hereby certify that the drainage studies, reports, calculations, designs, and specifications contained in this report have been prepared in accordance with the requirements of Benton County. Further, I hereby acknowledge that the review of the drainage studies, reports, calculations, designs, and specifications by Benton County or its representatives cannot and does not relieve me from any professional responsibility or liability."

Sincerely,

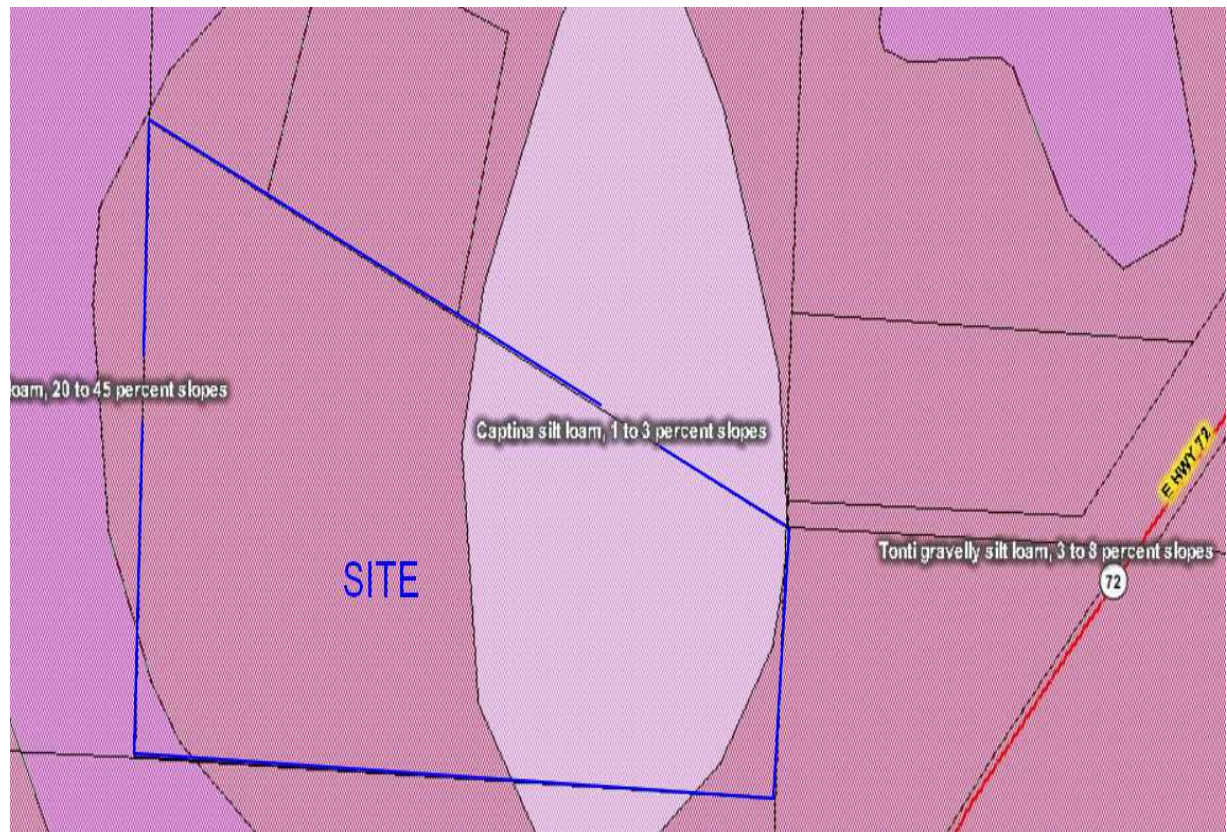

Geoffrey H. Bates, P.E.

POST DEVELOPED BASIN 1a

Hydrograph type = SCS Runoff
 Storm frequency = 100 yrs
 Drainage area = 1.550 ac
 Basin Slope = 0.0 %
 Tc method = TR55
 Total precip. = 8.64 in
 Storm duration = 24 hrs

Peak discharge = 5.66 cfs
 Time interval = 6 min
 Curve number = 78
 Hydraulic length = 0 ft
 Time of conc. (Tc) = 30.60 min
 Distribution = Type III
 Shape factor = 484

Hydrograph Volume = 34,730 cuft

Hyd. No. 4

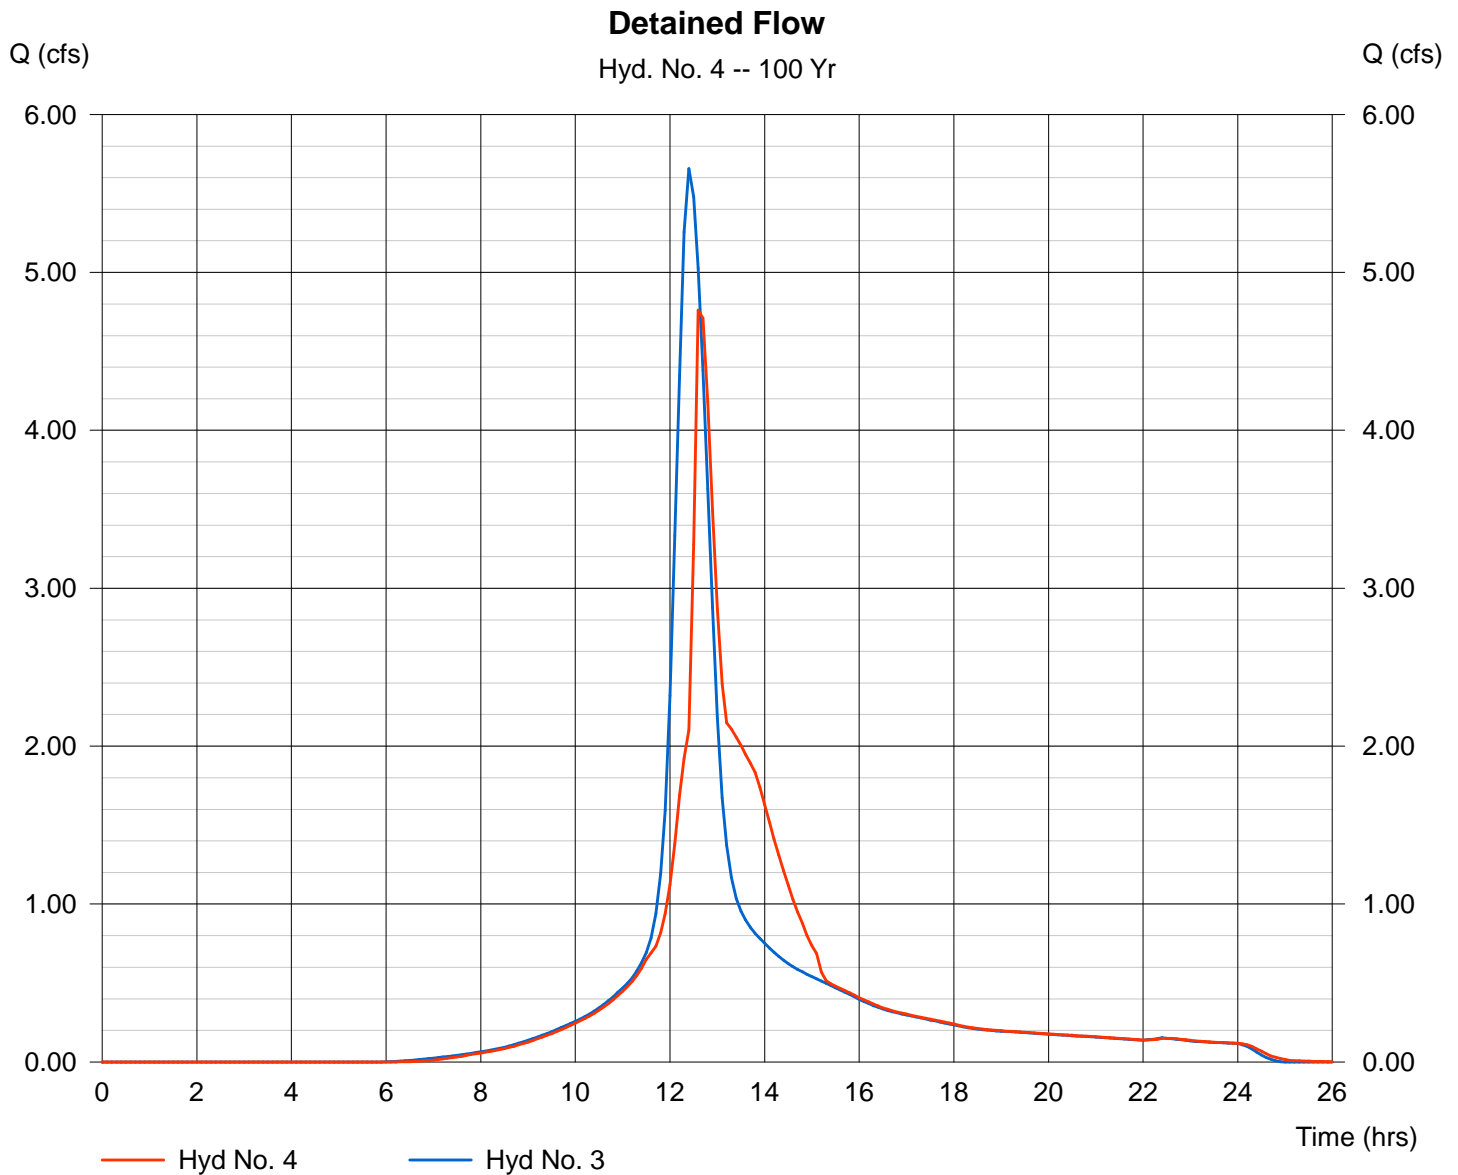

Detained Flow

Hydrograph type = Reservoir
 Storm frequency = 100 yrs
 Inflow hyd. No. = 3
 Reservoir name = Detention

Peak discharge = 4.76 cfs
 Time interval = 6 min
 Max. Elevation = 1347.70 ft
 Max. Storage = 6,141 cuft

Storage Indication method used.

Hydrograph Volume = 34,727 cuft

Pond No. 1 - Detention

Pond Data

Pond storage is based on known contour areas. Average end area method used.

Stage / Storage Table

Stage (ft)	Elevation (ft)	Contour area (sqft)	Incr. Storage (cuft)	Total storage (cuft)
0.00	1345.50	10	0	0
0.50	1346.00	992	251	251
1.50	1347.00	3,959	2,476	2,726
2.50	1348.00	5,740	4,850	7,576

Culvert / Orifice Structures

	[A]	[B]	[C]	[D]
Rise (in)	= 8.00	0.00	0.00	0.00
Span (in)	= 8.00	0.00	0.00	0.00
No. Barrels	= 1	0	0	0
Invert El. (ft)	= 1345.50	0.00	0.00	0.00
Length (ft)	= 20.00	0.00	0.00	0.00
Slope (%)	= 2.50	0.00	0.00	0.00
N-Value	= .013	.000	.000	.000
Orif. Coeff.	= 0.60	0.00	0.00	0.00
Multi-Stage	= n/a	No	No	No

Weir Structures

	[A]	[B]	[C]	[D]
Crest Len (ft)	= 8.00	0.00	0.00	0.00
Crest El. (ft)	= 1347.50	0.00	0.00	0.00
